The most interesting and exciting game of pool in the Associated Cycling Clubs' tournament took place at the Bloomfield Cyclers' club house last night. Messrs. Charles Bault and George Watson of the Tourist Cycle club of Paterson played in fine form. Although it was near one o'clock when the game was finished, a large number of enthusiasts remained to see the result. When the last frame was set up, the inevitable Johnson brothers, Percy H. and William L., had a score of 135 and the Paterson boys 185 with good prospects of winning. The final score was 195 to 203. The Paterson wheelmen were defeated at the American House of the Bloomfield Cyclers' club on Friday night, Jan. 10th.

The next game in the Bowling tournament of the Associated Cycling Clubs of New Jersey will be held next Wednesday night, Jan. 8th, at the Bloomfield Cyclers' club house with the Union County Roadsters as a Railway.

Leaves That Are Fifty Feet Long.
In our temperate climate none of the trees has leaves of a size that will even compare favorably with those of the sea island and tropical countries in general. The maple, the oak and the elm leaves are but infinitesimal bits of green when compared with the gigantic sheets of velvety verdure found on some of the trees, shrubs and plants of South and Central America.

The South American tree which has the largest leaf is the Inga palm, which grows on the banks of the Amazon. The leaves of this plant are often 50 feet in length, but they are very narrow, seldom exceeding 8 to 10 feet. With the Ceylonese coconut palm it is different. In that species the leaves are from 30 to 35 feet in length and from 18 to 18 in width. The natives of Ceylon are said to use these leaves in tentmaking, three or four being sufficient to make a shelter for a whole family. An extraordinary specimen of Ceylonese palm leaf now in the British museum, and which must be a freak—because the average length and breadth of the leaves of this variety of trees do not exceed the figure given above—is 36 feet in length and 28 in width, even though it is admitted that it must have shrunk one-fifth in drying.—St. Louis Republic.

The Porte.
The porte is the short name of the sublime porte, which is the official way of speaking of the Turkish government. In the east judicial business is transacted at the city or palace gates. One story says that the sultan of Bagdad put in the portal of his palace a piece of sacred black stone of Mecca, thus making his gate the porte. Another says that Sultan Orkhan built a gorgeous gate to his place in Brussa. Both of these stories are probably untrue so far as they purport to explain the name as applied to the Turkish government. Just as the British court is called the court of St. James and the late French court that of the Tuilleries, because their quarters were in the palaces of St. James and the Tuilleries respectively, so the Turkish court got the name sublime porte because its headquarters were in the palace of Be-As-Soultan or the Lefty Gate, in Constantinople. The name has been attached to the building in that city which shelters the four principal departments of the government—New York Sun.

These lessons will also end June 16, 1896.
